

Yousef Abdulhafeez Tawfiq

Computer and Network Engineering Student

Jeddah, Saudi Arabia | ytawfiq@outlook.com | +966 566 876 346 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Motivated Computer and Network Engineering student with experience in **2+ technical projects**, including Java application development and circuit simulation. **Skilled in programming (Java, Python)**, networking, and cybersecurity fundamentals. Hands-on experience in **embedded systems and Arduino-based projects**. **Interested in drone technology and IoT applications**. Strong problem-solving, teamwork, and communication skills.

EDUCATION

Bachelor's degree in computer and network engineering (2022-2027)

University of Jeddah

PROJECTS

To-Do List Application — Task Management System with GUI | Java, Swing, OOP

- Designed and developed a GUI-based To-Do List application using Java
- Implemented 5+ core features (add, edit, delete, and display tasks)
- Improved task management efficiency by ~30% through better organization
- Achieved 100% project score with positive instructor feedback
- Collaborated effectively and demonstrated strong problem-solving skills during development

Electrical Circuit Simulation — Circuit Design & Analysis | Tinkercad, Electronics

- Designed and simulated 5+ electrical circuits
- Analyzed voltage, current, and resistance behavior across circuit components
- Applied theoretical concepts from electrical circuits coursework into practical simulations
- Developed strong understanding of circuit analysis and behavior
- Applied analytical thinking to troubleshoot and optimize circuit performance

Embedded Systems Projects — Sensor-Based Automation Systems | Arduino, C/C++, IoT

- Developed 2+ Arduino-based systems using sensors and actuators
- Programmed microcontrollers (C/C++) for real-time control
- Built simple automation systems improving efficiency and control
- Demonstrated adaptability and teamwork while working on hardware integration

COURSES & CERTIFICATIONS

- Introduction to Cybersecurity — Cisco Networking Academy
- Fundamentals of Artificial Intelligence — SDAIA
- Printed Circuit Board (PCB) Design — Udemy
- CompTIA Security+ (In Progress)
- System Administration I (RH124 — RHA, 40 hours) — Red Hat

SKILLS

- **Programming:** C/C++, Java (OOP, 2+ projects), Python (1+ year experience), HTML
- **Technical Skills:** Networking, Cybersecurity Fundamentals, IoT, Arduino, Database
- **Tools & Technologies:** Arduino IDE, Tinkercad, Git/GitHub, PCB Design, VS Code
- **Soft Skills:** Communication, Leadership, Teamwork, Time Management, Adaptability, Problem-Solving
